## PROJECTS

### Automatic Water filter | 2 Month(s)

- Automatic water filter System is designed to control water flow by technology using ultrasonic sensor [HC-SR04](#).
- Sensor can detect any object in its range, it sends signal to Arduino and further the signal is traveled to the servo which is used to control the water nob.

### Web Development | 3 Month(s)

#### 1. [Website of a school \(2021\).](#)

- We created a website for a High-school.
- The website consists of all information like 'About School', 'Contacts', 'Teachers', 'Social Media handles' etc.
- We also added study materials for students of every standard which is very easy to access.
- Worked with the technology 'CSS' and 'Java script'.

#### 2. [Designing an e-commerce site \(2022\).](#)

- We designed an e-commerce site.
- Simple interface.
- It will very reliable to use.
- We added different category of products to target different age group of customers.
- Working with the technology 'php' and 'MY SQL' etc.

## AWARDS AND HONOR

- Top 10 in Class 10<sup>th</sup>
- 2<sup>nd</sup> position in 400m running in college level athletic competition.
