Experience

Podosphere Technologies	April 2024 – June 2024

Web Developer Intern   *Web Technologies, Shopify, WordPress*

- Pododphere is a leading global player in Shopify and WordPress web development which also has expertise in delivering complex solutions in SEO, Digital marketing and Application Development Maintenance, and Application Security.

Suvidha Foundation	Dec 2023 – Jan 2024

Web Developer Intern   *Web Technologies, PHP, JavaScript*

- As an intern at Subidha Foundation, I contributed to developing a web-based CRUD application using PHP, JavaScript, HTML, and CSS. My responsibilities included enhancing user interfaces, implementing data management features, and collaborating with the team to deliver a seamless user experience.

Projects

High School Website	*Jan 2021 - Mar 2021*

Website Development   *HTML CSS, JavaScript*

- **Project Description**: Collaborated on developing a comprehensive website for a high school.

  Features Implemented:

   About School: Detailed information about the institution, its history, mission, and facilities.
   Important Contacts: A directory of key staff members, including teachers, administrators, and support staff.
   Teachers Section: Individual profiles of teaching faculty, highlighting their qualifications and expertise.
   Grievance Section: Created a dedicated area for students, parents, and staff to address concerns.
   Study Materials Repository: Organized study materials for students across different standards, ensuring easy access.

- **Technologies Used**: **HTML & CSS** for styling and layout, and **JavaScript** for interactive elements.

E-Commerce Website	*Jun 2022 - Oct 2023*

Website Development   *HTML CSS, JavaScript, PHP, MySQL, Bootstrap*

- **Project Description**: Designed an efficient and user-friendly e-commerce platform.

  Key Aspects:

   User Interface: Prioritized simplicity and intuitive navigation for shoppers.
   Reliability: Ensured seamless transactions, secure payment gateways, and order processing.
   Product Categories: Segmented products into relevant categories (e.g., electronics, fashion, home goods) to cater to diverse customer preferences.
   Responsive Design: Optimized the site for various devices (desktop, tablet, mobile).

- **Technologies Employed**: **PHP** for server-side logic and **MySQL** for database management.
